

Unit CU756 Monitor and Solve Customer Service Problems

Aims

The learner’s job involves delivering and organising excellent customer service. However good the service provided, some of their customers will experience problems and the learner will spot and solve other problems before their customers even know about them. This Unit is about the part of their job that involves solving immediate customer service problems. It is also about changing systems to avoid repeated customer service problems. Remember that some customers judge the quality of their customer service by the way that the learner solves customer service problems. The learner can impress customers and build customer loyalty by sorting out those problems efficiently and effectively. Sometimes a customer service problem presents an opportunity to impress a customer in a way that would not have been possible if everything had gone smoothly.
